

ACCESS INTERNATIONAL, INC.
Software For Sales

An ACE™ In Your Pocket Beats a Telxon in Your Hand

If you still have Telxons or MSIs in the field, you're losing sales opportunities and wasting money every day.

Access International's ACE™ solution eliminates your old handhelds and the problems that come with them. Bundled with the Datalogic Memor for \$599* per unit, it's a solution that helps you sell more to your retailers.

ACE is part of Ai2's new generation of software and hand-held computers that enable you and your customers to significantly improve the ordering process.

ACE supports your customer's authorized product list including:

- ◆ Item number
- ◆ Product description
- ◆ Unit of measure
- ◆ Scanning UPC codes and your shelf tags
- ◆ Keying item numbers
- ◆ Emulated Item price and running order total
- ◆ Multicolored lines for item status indication
- ◆ 2-way communication methods with either PC or dial-up

With ACE, each customer will have a complete view and description of products they can order – updated as often as you like – on the hand-held computer display. Discontinued items will not appear and can no longer be ordered, boosting your fill rate and improving customer satisfaction. Entering items to be ordered is simple - customers can quickly use the numeric keypad or scanner.

With ACE, you will gain the following benefits:

- ◆ Reduced costs through increased flexibility
- ◆ Improved productivity and knowledge
- ◆ Eliminated data transmission errors
- ◆ Use of Windows OS to prepare you for future applications
- ◆ Reduced order entry errors
- ◆ Superior customer satisfaction

You now have the ability to improve the customer order entry process as well as your business operations with one solution. ACE delivers a fast, flexible, affordable solution that is easy to use. Get your demo kit today and try ACE in your office by calling (800) 835-3200.

*Per unit. Setup not included.
