

# Order Shark™

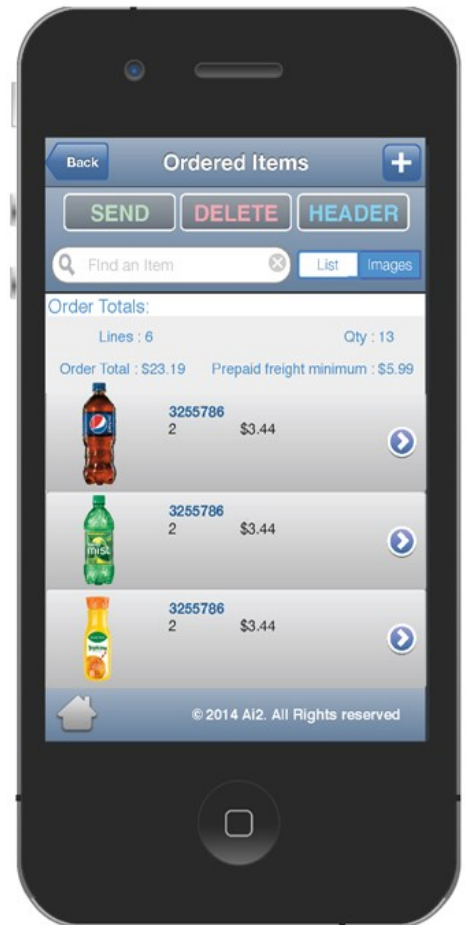

PREMIER SALES AUTOMATION SOLUTIONS

# OrderShark

- ▲ Thousands of retail stores use OrderShark every day to place quick, hassle-free orders from their distributors
- ▲ Runs on **iPhone, iPod Touch, iPad & Android phones** and tablets
- ▲ Install the app and you are ready to order
- ▲ Scans all types of UPCs, shelf tags and barcodes. OrderShark looks up product descriptions if the barcode is unknown
- ▲ Compatible with a Bluetooth barcode scanner if you want to use one
- ▲ Send your orders via cellular or WiFi directly from a retailer to a distributor or vendor
- ▲ Receive confirmations that your orders have been delivered and processed
- ▲ Save, copy and email orders to save time
- ▲ Place orders for multiple stores on the same device
- ▲ Attach comments to your distributor with your order
- ▲ Request or schedule your distributor to pick up returns

OrderShark works in any retail environment with iPhone 4S and up, iPod Touch, and any Android device running the Ice Cream Sandwich operating system or higher.

Independent retailers already have smartphones – let them bring their own device (BYOD) and use this mobile sales app to order from your wholesale distribution company.

Don't want to scan barcodes with the camera? No problem: OrderShark supports a Bluetooth scanner that's even faster than the phone's camera.

Download the free version from iTunes or the Google Play Store and see how it works. After that, contact Ai2 for information about the full OrderShark solution. You can be up and running with OrderShark, receiving orders directly into your ERP system, in just a few days.
